

Houssemeddine Leghelimi

Master's Student in Software Engineering & Intelligent Systems

+213 783 930 897 | leghelimihoussemeddine@gmail.com | houssemeddine.leghelimi@univ-constantine2.dz
Constantine, Algeria

EDUCATION

Master of Science — Software Engineering & Intelligent Systems (ILSI)

2024 – Present

University Abdelhamid Mehri – Constantine 2 | Faculty NTIC, Dept. TLSI | Constantine, Algeria

Specialty: Ingénierie des Logiciels et des Systèmes Intelligents (ILSI)

- Core topics: AI (ML, Deep Learning, CNNs, RNNs), Agile Development, Distributed Systems, Big Data & NoSQL, Cloud Computing, DevOps, Cybersecurity, Software Testing & Quality, Formal Methods
- Thesis (M2): Hybrid Digital Twin for Predictive Maintenance

Bachelor of Science — Computer Science, Software Engineering (GL)

Sep 2021 – Jun 2024

University Abdelhamid Mehri – Constantine 2 | Constantine, Algeria

Graduated with Merit

Core topics: Algorithms & Data Structures, OOP, Databases, Software Engineering, Software Quality, Web & Network Technologies, Software Project Management

- Final Year Project: Gamified Learning Platform for Computer Science Education

EXPERIENCE

AI Research Intern — NexBI

2026 – Present (ongoing)

NexBI | Remote / Algeria

- Learning and working on behaviour foundation models applied to intelligent systems
- Exploring research topics closely related to predictive intelligence and data-driven systems

Individual & Self-Initiated Projects

2021 – Present

A selection of personal technical work carried out independently:

- Web scraping tools and automation scripts
- Web and mobile application development / junior level (frontend & backend)
- 3D printer failure detection system

TECHNICAL SKILLS

Programming & Development:

Python, JavaScript, Java, C / algorithms, scripting, automation, web scraping

Artificial Intelligence & Data:

Machine Learning, Deep Learning, Data Analysis, Big Data concepts, NoSQL

Software Engineering:

Agile / Scrum, Software Testing & QA, Software Project Management, Software Architecture, Design Patterns, Distributed Systems, Cloud Computing basics, DevOps fundamentals (CI/CD, containerisation), Version Control,

Web & Mobile Development:

Frontend & Backend web development (junior level), mobile application development

Other Tools & Platforms:

Git/GitHub, Arduino, Linux, Cisco Networking basics, AWS Cloud foundations

LANGUAGES

Arabic	Native
English	B2 – IELTS Academic
French	A2 – Independent User

INTERESTS & ADDITIONAL ACTIVITIES

IoT & embedded hardware, intelligent software systems
Autonomous self-learning projects; motivated to explore new technologies independently
